

11/14/07 from Tom Dunkelman

Tonight at 5:30 I spoke with Marvin Donlus the operator of the Mushroom Express Facility. I believe he is also the landowner. Mr. Donlus indicated he was planning to remove hazardous materials from his facility beginning as soon as tomorrow. I told him EPA would check back and monitor his progress. My opinion is, given the circumstances, there is no need for an order or action memo, but that we should check back and make sure he takes care of the problem. If he does not, then we could explore enforcement options.
